AXON ACTIVE
www.axon.vn

PRODUCT OWNER

- Only PO is responsible for product
- Define the features of the product (PBL)
- Decide release date based on estimation of content
- Be responsible for ROI
- Prioritize (PBL) features according to market value
- Change features and priority at product level
- Accept or reject work results: Review meeting, DoD (Definition of Done)

PRIORITY MoSCoW

Must have: The requirement is essential, key stakeholders needs will not be satisfied if this requirement is not delivered and the timebox will be considered as a failure. **MUST** can be considered a backronym from **Minimum Usable SubseT** ~30%

Should have: This is an important requirement but if it is not delivered within the current timebox, there will be an acceptable workaround until it is delivered during a subsequent timebox ~30%

Could have: It is nice to have requirement: we have estimated that it is possible to deliver this in the given time but will be one of the requirements de-scoped if we have underestimated requirements in this category will not be delivered within the timebox that the prioritisation applies to ~30%

Won't have: The full name of this category is "Would like to have but Won't Have during this timebox"; requirements in this category will not be delivered within the timebox that the prioritisation applies to

www.axonactive.com fb.com/AxonActiveVietnam

I am not a project manager I am the driver of this project

User Story Construction

As a <user roles> WHO? I want <goals> WHAT? So that <reason> WHY? Can I <acceptance criteria>

Product - Backlog (PBL)

- Items at top are more granular than items at the bottom
- One list per product, one product backlog for one team (area product backlog)
- List of functionality, technology, issues
- Anyone can contribute
- Driven by Business and Vision
- The list is maintained and public posted

Requirement Issue Are INVESTABLE

- I Independent
- Negotiable (until sprint)
- V aluable (for customer)
- S timable
- E small
- A estable

Detailed Estimated Emergent Prioritised

Core Rule

- PO needs second review → Lack of responsibility and strictness
- PO is not authorized → will slow down the process and will also make the planning inefficient
- PO is not available → Out of responsible
- PO gets no support from Management
- We'll figure it out later → Lack of goal and vision
- Everything is important → Lack of priorities
- PO doesn't care how you get there, just do it → Lack of clarity
- Who wrote this story? → Lack of presence
- Let me ask the client about this → Lack of decision making

User Story Mistake

As a user I want to be able to manage ads, so that I can remove expired and erroneous ads. We have all three criteria But, Who is the User?

As a Product Owner I want the system to have possibility of deleting ads, so that users have possibility of deleting ads. We have all three criteria but the writing person only want this, the person Don't explain why he need this feature

As a commercial advertiser I want to have filtering option. We have the User Role. But, The Reason and Business Value is missing

www.axonactive.com fb.com/AxonActiveVietnam

AXON ACTIVE
www.axon.vn

SCRUM MASTER

I have 10

- Scrum**
 - Be an Example
 - Establish Scrum
 - Enable a potentially shippable product after each Sprint
 - Enable time-box
- Agile**
 - Facilitate meetings
 - Continue learning Agile & Scrum for team and yourself
 - Continuously increase productivity and quality
 - Continuously improve developing, engineering practices
 - Be sure that impediments will be eliminated
- Coach**
 - Lead by serve
 - Coach agile
 - Ask indirect questions
 - Training and coaching for each new and old team member, this is a continuous process (technique, framework,...)
 - Influence but no authority
 - Mediate through conflicts
 - To enable that everybody will gather impediments
- PO**
 - Support and guide my PO with his responsibility of his backlog
 - Get developing only driven by PO
 - Remind PO about maximizing ROI
- Team**
 - Get the team self-organized
 - Get the team decide
 - Get the team responsible
 - Get the team work cross-functionally
- Scrum Team**
 - Make sure everybody work full productive
 - Make sure Team & PO will work together
 - Make sure teamwork is good

www.axonactive.com fb.com/AxonActiveVietnam

I'm not a Team Leader I'm not a Manager I have to be Master of Scrum I'm a Facilitator

LEGS

- 1 Transparency
- 2 Inspection
- 3 Adaption

Ask the team

- Is this useful?
- What should I do? / What can we do
- Do you think we should do?
- What is your decision now?
- I noticed <situation> what shall we do?
- I feel <feeling> do you share that?

Impediment

- Remove redundancy steps
- Get everything away that can reduce the productivity
- Don't accept status quo, ...

Retrospective

Quick

- What could you see? (x answer)
- What could you feel? (x answer)
- What could you learn? (3 answer)
- What should be changed! (1 sentence + plan)

Order by:

- Customer Value
- MoSCoW
- Risk

Physical

- User story
- Pen
- Sticky note
- Teamboard
- Camera
- Index cards

Team Decision

- Vote by hand
- Use sticks, dots
- Poker cards

Management

- Kanomodel
- Project success Management 3.0
- PDCA-Cycle

www.axonactive.com fb.com/AxonActiveVietnam

AXON ACTIVE
www.axon.vn

TEAM

My Daily Questions?

- 1 What did I do yesterday that helped the team?
- 2 What will I do today to help the team?
- 3 Do I see any impediment that prevent me or the team?

12 Principles Of Agile Software

1) Produce Value Early	7) Working software
2) Welcome Change	8) Sustainable pace
3) Iterative Delivery	9) Technical excellence
4) Daily Business Collaboration	10) K.I.S.S
5) Trust motivated team	11) Self-Organized
6) Face to face	12) Reflect and adjust

Agile Manifesto

Individuals and interactions **over** processes and tools
 Working software **over** comprehensive documentation
 Customer collaboration **over** contract negotiation
 Responding to change **over** following a plan

- Cross-functional, 7+/-2 members (full-time membership; Team based not Project based)
- The Team has meeting, daily meeting (daily stand UP)... everybody is there on time every day, everytime (penalty for late)
- People offer to help others

www.axonactive.com fb.com/AxonActiveVietnam

« all for one, one for all »

- There are a lot of talking and interaction, the Team is self-organized
- Be sure requirements are splitted into maximum one day item task
- Estimates are updated every day (by remaining time)

THE TEAM IS RESPONSIBLE FOR DELIVERING THE PRODUCT AFTER EACH SPRINT

- The Team selects the iteration goal and specifies work results (based on PO's priority, Customer Value, Risk)
- The Team has the right to do everything within the boundaries of the project guidelines to reach the iteration goal and business value
- The Team applies TDD, XP, DoD, Clean code, responsible for quality
- The Team understands the business of the product and architecture
- The Team demos only **DONE** requirement to Product Owner

* the time is based on 2 weeks sprint
